

**FOR IMMEDIATE RELEASE:**

## **Spaulding Clinical Research, LLC Successful FDA Inspection**

*Spaulding Clinical Research Headquartered in West Bend, Wisconsin has just successfully completed their most recent FDA inspection.*

**West Bend, WI** – November 06, 2018 – Spaulding Clinical Research, LLC, a global clinical pharmacology, cardiac safety and biometrics solutions provider, announces the U.S. Food and Drug Administration (FDA) performed a routine inspection related to a specific clinical trial conducted in 2017. On the fifth and final day, the FDA auditor concluded that no observations or findings were identified and that all clinical trial results were well-organized and well-documented.

This is Spaulding Clinical's first inspection for 2018 and this 5-Day FDA inspection is a great testament to the company's investments in quality and talent.

"We are proud of the successful outcome of the FDA inspection in October 2018, as it reflects our significant investment in our staff, processes, and quality systems. We salute the performance of our RA/QA leadership and the excellent management of the clinical trial by our Project Management Staff. Spaulding Clinical runs many complex early phase trials, and this inspection supports the high level of quality and attention to detail brought to all trials by our investigators and staff. We are part of a large regulated industry that strives to improve the health and wellness of a global community and it is gratifying to receive confirmation that our Organization's quality objectives and business goals are aligned in terms of compliance and performance for the benefit of the community." – Cassandra Erato, Chief Operating Officer of Spaulding Clinical
