

# Save 100+ Days

## Accelerate final protocol to final CSR with Spaulding 1Source™

1Source outperforms traditional data management, expediting timelines with instant access to more accurate data free from transcription errors.

**1SOURCE**  
Powered by Spaulding Clinical

### Final Protocol to Database Live in 4 weeks

Spaulding 1Source provides SDTM- & CDISC-compliant data using a database built from CRFs using pre-populated libraries, saving conversion and QC time.

### LSLV to Database Lock in 1 week

Spaulding 1Source collects data in eSource and performs edit checks in real time, condensing 1-2 weeks of data entry, 4 weeks of source verification, and 2 weeks of edit checks into just 7 days.

### Database Lock to Final CSR in 38 days

Spaulding 1Source uses proprietary software to process SDTM data live during your study and in parallels after database lock, minimizing processing and programming time.

Harness the **Power of 1**  
One Data Source From Start to Finish
